PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience designing business-critical systems (POS, ERP, SaaS) on .NET and Angular. I work end-to-end: backend architecture with ASP.NET Core and EF Core, Angular interfaces with TypeScript, and deployments on Azure and AWS. AI integration into business flows and process automation with n8n. Focused on performance, maintainable code, and shipping software that solves real problems in electronic invoicing, accounts receivable, and inventory traceability.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Own Projects / Freelance **2023 — Present**
Independent development (SaaS + ERP) *Córdoba, AR*

- Design and deployment of 5+ production systems with .NET and Angular on Azure and AWS: POS/ERP, gym management SaaS, and e-commerce with MercadoPago integration.
- Integration with Clover POS terminals: use of the Cloud Pay Display app, development of custom tenders for QR generation and integration, and creation of a custom Clover app bundling both capabilities.
- Full frontend development in Angular: modular architecture, RxJS, reactive forms, lazy loading, and REST API consumption.
- Optimization of critical queries in EF Core via DTO projections and AsNoTracking, achieving sub-second response times on high-volume listings.
- AI integration (OpenAI, Anthropic) and automation with n8n: chatbots, document classification, webhooks, and API orchestration.
- Accounts receivable modules with FIFO payments, auditable inventory traceability, and report generation with QuestPDF.
- Containerization with Docker and resource administration on Azure (App Service, SQL Server, PostgreSQL).

Professor — Programming III & Software Engineering **Jan 2026 — Present**
Instituto Técnico Superior (ITS) *Córdoba, AR*

- Teaching data structures, OOP, and system design, with a focus on agile methodologies and architecture patterns.
- Mentoring capstone projects applying Clean Architecture and software engineering best practices.
- Integration of AI and automation tools into the curriculum.

Backend Developer **2023**
No Country (job simulation) *Remote*

- REST APIs in ASP.NET Core within a Scrum team, applying SOLID and Clean Architecture on PostgreSQL.

FEATURED PROJECTS

POS/ERP — Sales, Inventory & Accounts Receivable

- Complete modular system (Angular + .NET) with sales, cash register, inventory, suppliers, and accounts receivable history, deployed and monitored in production.

- Accounts receivable with FIFO payments, consistent balances, and full traceability of every movement.
- n8n automations for low-stock alerts and cross-module synchronization. Reporting with QuestPDF.

SC Dental — Clinic Management + Landing Page

- Digital ecosystem with a public landing page and an internal system for scheduling, clinical records, and patient-care flows.
- Azure architecture with SQL Server, in production at scdental.com.ar.
- Identity Server authentication and AI integration for appointment suggestions.

TECHNICAL STACK

Backend. C#, ASP.NET Core, EF Core, LINQ, Clean Architecture, SOLID, Design Patterns.

Frontend. Angular, TypeScript, RxJS, Angular Material, Tailwind CSS, React.

Integrations & POS. Clover POS, Cloud Pay Display, custom tenders (QR), MercadoPago API.

Databases. SQL Server, PostgreSQL, query optimization, indexing, DTO projection.

Cloud & DevOps. Azure (App Service, SQL, PostgreSQL), AWS, Docker, CI/CD, Identity Server.

AI & Automation. OpenAI API, Anthropic Claude, n8n, LLM integration, prompting.

Methodologies. Scrum, Agile, Unit Testing, QuestPDF, MercadoPago.

EDUCATION

Higher Technical Degree in Software Development **2021 — 2023**
Instituto Técnico Superior (ITS) *Córdoba, AR*

LANGUAGES

Spanish — Native
English — B2 (Upper Intermediate)
